Our lines are always open

Notice of work

19 March 2018

As a local business, we are writing to inform you of work we are carrying out on our assets near the North Weylands Industrial Estate in Walton On Thames.

What we are doing

Following a collapse of a gravity sewer, on the late evening of 15 March 2018, emergency works have been ongoing to make the repairs needed on our assets. This work is primarily in the area of the industrial estate.

There are no interruptions to the wastewater service we provide and there will be temporary tankering in place over the next few days. Traffic management has been set up to manage a part-road closure on the industrial estate and a diversion is in place to help. We are running initial investigations and tests to determine any additional requirements needed for the site and depending on our findings, we may need to continue with further work within the area.

For parts of the work our contracting partners Cappagh and Lanes For Drains will be on site to assist and you may see their vans alongside the Thames Water ones. While we're working nearby we'll try to keep noise and our vehicle movements to a minimum. We'd like to thank you in advance for your patience and understanding in this matter.
